## Feeding Your Future...

**T**he thought of running your own business has all sorts of attractions: the chance to please yourself to suit your lifestyle, the opportunity to put your personal expertise into practice, or simply a complete change of direction. You may have certain qualities that will complement any business venture but the specifics, the systems, the products and the strength of a network adds to the benefits of considering a franchise business.

### The Pet Food industry...

If there is a market showing growth it's the demand for pet food. Why? Because the UK is a nation of pet lovers who want to ensure they feed the best to their faithful companions. Combining this with the convenience of home delivery – a service that has seen massive growth in recent years – offers you a ready-made franchise business with very good prospects.

OSCAR Pet Foods specialises in providing the complete pet care service direct to the customer, from food and toys to treats, accessories and health care products. Using premium, locally sourced ingredients (where possible), nutrition is the primary consideration to sustain a healthy lifestyle for cats and dogs. The service is backed up with FREE advice from experts in nutrition, behaviour and veterinary matters.

### OSCAR tried and tested...

A system which can offer assurance to anyone with a business interest but with no given skill is backed up and supported by professionals throughout. The investment choices include a strong training and support package, which ensures you are never alone. OSCAR is also the only pet food franchise to offer an official qualification in companion animal nutrition: Certcan (QCF - Level 3).

Franchise opportunities are flexible and tailored to suit individual backgrounds and/or experience, whether to develop into a full-time business, treat as a second income or even add to an existing operation.

**OSCAR is a full member of the British Franchise Association and the Pet Food Manufacturers' Association**
