

Business building

Since Stuart and Teresa Curtis bought an existing OSCAR pet food home delivery franchise, they haven't looked back

For the last 20 years OSCAR has helped create successful businesses for many individuals and partnerships, assisting people such as Stuart and Teresa Curtis to realise their dream when one of the company's franchises became available in Bedford and the surrounding area.

"We wanted to change our lifestyle," Stuart explains. "The long, unsociable hours of working in the public transport sector had reached the point of no return for me, resulting in the decision for Teresa and I to build a business together."

Dream

Stuart adds: "It has been a long-term dream and to find an OSCAR franchise for sale in our area came just at the right time. The product gave us the chance to work with something we love - pets."

"Some years ago we were OSCAR customers in another area, so we understood the benefits of the food and the excellent service. Meeting the franchise team, who were extremely supportive, confirmed that no other franchise would be of interest."

The process of buying an existing OSCAR business was thorough and seamless, according to Stuart.

The product gave us the chance to work with something we love - pets

Adapt

"It has helped us to adapt with ease, happily meeting existing customers while looking forward to new challenges over the coming months. Supported by an excellent range of products, we can also provide our elderly rescue dogs Skeet, Lucy and Freddie with a senior diet that includes a mobility system to help them maintain good health at this stage of their lives."

"There is great satisfaction in knowing we can work well together, but now we also have the time to enjoy and develop our respective interests outside of the business." **WF**
