Oscar's Pet Foods franchise supports microchipping

Date:15-Jun-11

It's National Microchip Month, the month when supporters such as Oscar like to take this opportunity to remind pet owners just how important it is to have their pet's microchipped.

Oscar Nutritional Advisor Frank Newsome from Wrexham says, "I have experienced many instances where by pets have been lost and reunited with their owners on the same day!

This is all thanks to pets being micro-chipped and logged by their owners. Scanners are widely available at Kennels, Vets, Animal & Rescue Centres, so the pet can be tracked

right back to the owner very quickly. I have also found that micro-chipping my customers pets at home is a great benefit as I already know the animal and this reduces the stress levels in both the pet and Owner."

Remember a microchip is more likely to bring them home quickly and safely should they go missing!

There are many reasons as to why a pet will go missing and the question of how safe is a loving home means that a microchip offers extra security. Oscar nutritional and behavioural advice backs up the message of responsible pet ownership and complete with a range of quality foods, health care products, toys, treats and training aids, Oscar offers a relaxing and comfortable microchipping facility in the comfort of the home.
